SUMMARY

Recent Informatics graduate from Atma Jaya University Yogyakarta with practical experience in developing web applications. Familiar with working on both frontend and backend development to create functional software solutions. Possesses strong teamwork and leadership skills demonstrated through active roles in university organizations. Eager to contribute technical abilities and problem-solving skills to a dynamic IT team.

EDUCATION

HIGH SCHOOL

Aug 2019 - Mar 2022

Kolese De Britto Yogyakarta High School.

- Graduated from high school majoring in social sciences.

University

Aug 2022 - Aug 2026

Atma Jaya Yogyakarta University.

- Bachelor's Degree in Informatics.
- Passed Yudisium, awaiting formal graduation - GPA : 3.48 / 4.00.

TECHNICAL SKILLS

Programming & Core Web: PHP, Python, Java, C, HTML/CSS

Frameworks & Libraries: Laravel, Livewire

Databases & Tools: MySQL, Git, GitHub, Postman

UI/UX & Multimedia: Figma, Canva, Adobe Premiere Pro, After Effects

PROJECTS

Padukuhan Ngasem | *HTML, CSS*

April 2025 - Aug 2025

Website: <https://padukuhan-ngasem.vercel.app/>

- Developed a single-page responsive website to digitalize and centralize local information for Padukuhan Ngasem.
- Designed and structured an intuitive user interface featuring dedicated sections for local news, tourism potential, and a media gallery.
- Handled end-to-end development as the sole developer, delivering a functional digital profile to improve the village's public visibility.

LAB SD Booking & Inventory System | *Laravel, Livewire*

Jan 2026 - Feb 2026

Repository: <https://github.com/DJuYuan/SmartLab-SD>

- Developed a comprehensive full-stack management system for the campus Data Structure Laboratory, handling real-time bookings for individual computers, clusters, and lab facilities.
- Integrated an inventory tracking module to systematically monitor and manage laboratory equipment and assets.
- Engineered a master-client control architecture over a Wi-Fi network by developing custom client-side scripts, successfully overcoming physical LAN limitations to remotely control lab PCs.

MuaraJogja (Local Information Aggregator) Laravel, Livewire Repository: https://github.com/DJuYuan/agregatorBerita - Developed a full-stack aggregator platform using Laravel and Livewire to automatically collect, categorize, and present local news and information about Yogyakarta from various external sources. - Engineered automated data pipelines utilizing cron jobs and background processing to ensure continuous data synchronization without compromising frontend performance. - Built a comprehensive admin dashboard to manage aggregated content, monitor system statistics, and control the execution of background tasks.	Oct 2025 - July 2026
---	-----------------------------

ORGANIZATIONAL EXPERIENCE	
Member, Kelompok Studi Pemrograman - Learned and implemented fundamental and advanced C programming concepts, including data structures and memory allocation. - Collaborated with peers to solve complex programming case studies and hone algorithmic logic skills.	Aug 2022 - Jul 2023
Creative & Documentation Staff, UNISEC UAJY (Including UEC) - Designed visual identities, official logos, and digital promotional materials across social media platforms. - Produced event recap videos and digital posters using Adobe Premiere Pro, After Effects, and Canva to increase event engagement. - Designed the official jersey for the UNISEC UAJY team to be used during the 2024 competition season.	Oct 2023 - Sept 2024
Group Leader, KKN Class 87 UAJY - Group 49 Ngasem, Gunung Kidul - Led and coordinated a 9-member team to successfully execute 14 community work programs. - Supervised the implementation of UMKM digitalization and creative content creation to boost local tourism potential. - Acted as the main liaison between the student group, university, and village officials to ensure smooth program execution.	April 2025 - Aug 2025

COURSE AND CERTIFICATIONS	
Programming in Contest 2023 Programming competition using C++ programming language	May 2023
British Council Common European Framework of Reference for Languages	June 2024

ADDITIONAL INFORMATION	
Languages: Bahasa (Native), English (Intermediate), Japanese (Basic). Awards/Activities: Programming contest award at PNC, and KKN group leader.
